### Abstract

The abstract of the article.

*Keywords:* keywords, not capitalized, Java.

---

## 1. Introduction

This template demonstrates some of the basic markdown you'll need to know to create a JSS article with **pagedown** (Xie, Lesur, Thorne, and Tan 2022).

### 1.1. Code formatting

You should use **Pandoc**'s markdown but you also can use *L<sup>A</sup>T<sub>E</sub>X* commands:

- Java or Java
- **plyr**, `plyr` or `plyr`
- `print("abc")` or `print("abc")`

## 2. R code

Can be inserted in regular R Markdown blocks.

```
R> x <- 1:10  
R> x
```

```
[1] 1 2 3 4 5 6 7 8 9 10
```

## 3. Render the document

If you use the option `self_contained: false` (see line #22 of this Rmd file), don't click on the **Knit** button in RStudio. Use instead the **xaringan** (Xie 2024) RStudio add-in *Infinite Moon Reader*.
